

## Wednesday Challenge Form

Group Members: Nick, Me

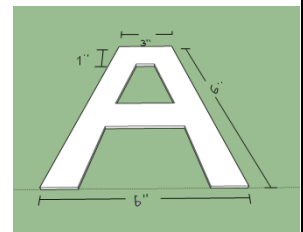

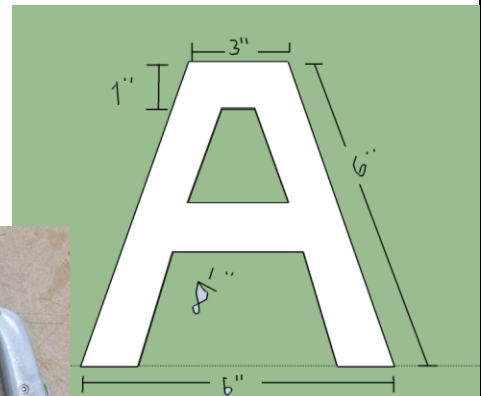

**Problem Statement:** We have to make an “A” in SketchUp and give it to the judges. Then we receive another groups design to cut out. The goal is to get the actual product as close to the SketchUp as possible.

### Approach:

**Design we had to fabricate:**

### Our Design:

**Solution:** We measured our fabricated A multiple times before cutting, but we still had 2.9 discrepancy overall. We got 10<sup>th</sup> place.

**Lessons Learned:** In real life, you may be given designs that are not realistic. There won't be a teacher to just excuse you, it is your problem to deal with.
