

## Wednesday Challenge Form

Group Members: Me

**Problem Statement:** Fidget toys are meant to occupy a person's hand to improve focus. In groups, design a fidget toy. Design must align with the previous Wednesday Challenge rules: Under \$0.50 to make, must have 589 somewhere, able to make hundreds, etc.

### Approach:

Students got into groups and came up with ideas. And, I walked around and helped

**Solution:** Lucas' group came up with a bean filled, stress ball that looks like a blimp. It won because it was cost effective and it represents the game.

**Lessons Learned:** It's hard coordinating groups.
